

Career Development Advisors

## **CAREER EXPLORATION COACHING FOR YOUTH AGES 13 - 24**

Could your son/daughter use help:

- Figuring out their interests, skills, values, strengths and personality to begin to assess what future careers might be a fit for them?
- Learning about different career clusters and which ones to target for further research and exploration?
- Writing a first resume for college applications, scholarships and future job or internship searches?
- Understanding how to interview via telephone or video conference for a job or college entry?

*There is no one right path.*

Tradition has led many students to choose a career that their mother or father has, or to apply and attend a 4 - year college program just because- that's what everyone does, right?

### **Consider these statistics for 2020:**

- 35% of jobs DO NOT require schooling beyond high school
- 65% require some college, a Bachelor's or beyond
- 80% of college students change their major at least once

Higher Education is a HUGE investment of time, money and personal energy, among many other resources.

So, now, more than ever- it's important to help our kids discern possible career paths based upon their likes, skills and strengths. This is

Career Development Advisors

certainly hard to do when they have typically only been in a prescribed, traditional classroom environment since they were in 1<sup>st</sup> grade. While there is no crystal ball, there are ways to help your son/daughter begin to discern choices that are right for them.

### **Beginner Career Coaching Package for Youth & Students**

Your son/daughter will discover their current values, interests and strengths as we utilize core assessments, and help your student begin to identify possible career paths associated with their results.
